20 SEP 1963

DEPUTY DIRECTOR OF  
DEFENSE RESEARCH AND ENGINEERING

MEMORANDUM FOR THE DEPUTY DIRECTOR, SCIENCE AND  
TECHNOLOGY, CIA

SUBJECT: Missile and Space Intelligence

I agree in principle with your comment in your letter of 23 August 1963, that we must proceed much further in our understanding of what must be done in the Missile and Space Activities field before we consider joint DOD-CIA action to improve national capabilities. As a step toward this objective, I will shortly begin a detailed review of DOD Missile and Space Activities in conjunction with General Carroll and hope to be in better position to continue our discussions by the time [redacted] has completed his initial study.

In the interim we shall, of course, be happy to assist [redacted] in any way possible. I have asked [redacted] my Assistant for Special Intelligence, to handle this for me and to serve as a point of contact for him in my office.

Signed  
Eugene G. Fubini

Eugene G. Fubini

OSD has no objection to declassification and release.

OSD review(s) completed.
